### Description

A harmonious marriage of fruit and beer. The fruits add extra complexity to the beer but are not so prominent as to unbalance the resulting presentation.

### Service:

Glass: Tulip Glass  
Temperature: 4-6°C

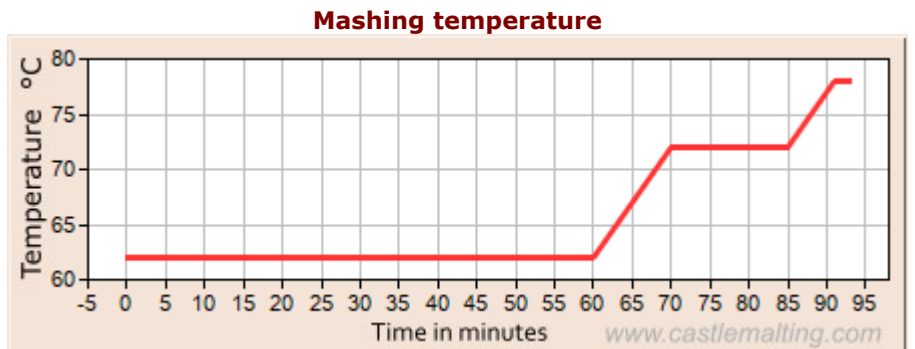

### BREWER'S TIPS

You can add only one type of concentrated juice or, to make it even more complex, you can mix them all before adding to the fermentor.

This recipe is provided by Castle Malting®. Please note that this recipe is just a guideline. Some modification might need to be done to meet different technologies, efficiencies and ingredients yield as grain dry extract and hop alpha acid percentage.
