Egenskaber			
This NON-malted cereal is to be used carefully as an adjunct that may provide many benefits.			
Karakteristika			
Raw oat will give to the beer a fuller body and a creamy silky mouthfeel, thanks to their high content of beta-glucans. Raw oat provides a lot of non-fermentable sugars in the wort resulting in high final gravity, and therefore in sweeter, smoother flavors in the beer. Raw oat is usually mashed separately before its addition to the main mash. However, it could also be used directly in combination with Château Pilsen 6-row to compensate for the viscosity the oats will impart and to bring more proteins contributing to head retention.
